Brief Description	Brief Description	Brief Description	Brief Description	Brief Description	Brief Description	Brief Description
ACT Raising Safe Kids Program is a universal parenting program designed to promote positive parenting and prevent child maltreatment by fostering knowledge and skills that change or improve parenting practices. The program is delivered by trained and certified ACT Facilitators in 9 sessions of 2-hour each on average. The ACT program has a universal public health approach and aims to reach to all parents of young children in a given community. The ACT program addresses parents' use of effective, nonviolent discipline and nurturing behaviors. It addresses parental knowledge of child development, discipline methods, and media literacy. It also addresses parents' anger management, social problem solving skills and their ability to teach/model these skills to children. By promoting effective parenting practices, the program also addresses children's aggression and behavior problems. ACT also provides a supportive community of parents who help and support each other during and after the program: it builds community.	HFA is a home visiting program model designed to work with overburdened families who are at-risk for child abuse and neglect and other adverse childhood experiences. It is designed to work with families who may have histories of trauma, intimate partner violence, mental health issues, and/or substance abuse issues. HFA services are offered voluntarily, intensively, and over the long-term (3 to 5 years after the birth of the baby). The HFA model is based upon 12 Critical Elements. These Critical Elements are operationalized through a series of standards that provide a solid structure for quality, yet offer programs the flexibility to design services specifically to meet the unique needs of families and communities.	HFA is a home visiting program model designed to work with overburdened families who are at risk for child abuse and neglect and other adverse childhood experiences. It is designed to work with families who may have histories of trauma, intimate partner violence, mental health issues, and/or substance abuse issues. HFA services are offered voluntarily, intensively, and over the long-term (3 to 5 years after the birth of the baby). The HFA model is based upon 12 Critical Elements. These Critical Elements are operationalized through a series of standards that provide a solid structure for quality, yet offer programs the flexibility to design services specifically to meet the unique needs of families and communities.	The Nurturing Parenting Program for Parents and their Infants, Toddlers and Preschoolers is a family-centered program designed for the prevention and treatment of child abuse and neglect. Both parents and their children birth to five years participate in home-based, group-based, or combination group-based and home-based program models. Lessons are competency-based ensuring parental learning and mastery of skills. The program lessons focus on remediating five parenting patterns known to form the basis of maltreatment: Having inappropriate developmental expectations of children Demonstrating a consistent lack of empathy towards meeting children's needs Expressing a strong belief in the use of corporal punishment and utilizing spanking as their principle means of discipline Reversing the role responsibilities of parents and children so that children learn to become the caregivers to their parents Oppressing the power and independence of children by demanding strict obedience to their commands Built in assessments (pre, process, and post) allow the practitioner and the parents to track the acquisition of new knowledge, beliefs and skills.	The Nurturing Parenting Program for Parents and their School Age Children 5 to 12 Years is a 15-session program that is group-based, and family-centered. Parents and their children attend separate groups that meet concurrently. Each session is scheduled for 2.5 hours with a 20-minute break in which parents and children get together and have fun. The lessons in the program are based on the known parenting behaviors that contribute to child maltreatment: Inappropriate parental expectations Parental lack of empathy in meeting the needs of their children Strong belief in the use of corporal punishment Reversing parent-child family roles Oppressing children's power and independence Assessment (pre, process, and post) of parent's parenting and child rearing beliefs, knowledge, and skills allows the program facilitators to measure the attainment of lesson competencies.	Parents as Teachers is an early childhood parent education, family support, and school readiness home visiting model based on the premise that "all children will learn, grow, and develop to realize their full potential." Based on theories of human ecology, empowerment, self-efficacy, attribution, and developmental parenting. Parents as Teachers involves the training and certification of parent educators who work with families using a comprehensive curriculum. Parent educators work with parents to strengthen protective factors and ensure that young children are healthy, safe, and ready to learn.	The overall Triple P program is a multi-tiered system of 5 levels of education and support for parents and caregivers of children and adolescents. Although Triple P can be used in parts (e.g., using only one level of the five or a group version versus standard), this entry on the CEBC reviews <i>System Triple P</i> as a whole (i.e., using all 5 levels) in its standard version and only reviewed research evidence that evaluated the whole system. The CEBC also evaluated Level 4 Triple P as a separate program and it is rated a "1 - Well-Supported Research Evidence" on the Scientific Rating Scale in the areas of Parent Training and Disruptive Behavior Treatment (Child & Adolescent).
Program Goals	Program Goals	Program Goals	Program Goals	Program Goals	Program Goals	Program Goals
The primary goals of the ACT Raising Safe Kids Program are: • Educate parents and caregivers of young children to create safe, stable, nurturing relationships and environments that prevent child maltreatment; protect children and youth from long-term consequences of maltreatment • Provide research-based knowledge, tools, and skills for effective parenting practices • Provide a supportive, nonjudgmental, interactive, and fun environment for learning and sharing to occur; to nurture and promote the development of social support networks among participants	The goals of <i>Healthy Families</i> America (HFA) are to: •Build and sustain community partnerships to systematically engage overburdened families in home visiting services prenatally or at birth. •Cultivate and strengthen nurturing parent-child relationships. •Promote healthy childhood growth and development. •Enhance family functioning by reducing risk and building protective factors.	The goals of <i>Healthy Families America</i> (<i>HFA</i>) are to: •Build and sustain community partnerships to systematically engage overburdened families in home visiting services prenatally or at birth. •Cultivate and strengthen nurturing parentchild relationships. •Promote healthy childhood growth and development. •Enhance family functioning by reducing risk and building protective factors.	The overall goals of Nurturing Parenting Program for Parents and their Infants, Toddlers and Preschoolers are: •Measurable gains in the individual self-worth of parents and children •Measurable gains in parental empathy and meeting their own adult needs in healthy ways •Measurable gains in parental empathy towards meeting the needs of their children	The overall goals of Nurturing Parenting Program for Parents and their School-age Children 5 to 12 Years are: •Measurable gains in the individual self-worth of parents and children •Measurable gains in parental empathy and meeting their own adult needs in healthy ways •Measurable gains in parental empathy towards meeting the needs of their children •Utilization of dignified, non-violent disciplinary strategies and practices		The overall goal of <i>System Triple P</i> is to: Prevent development, or worsening, of severe behavioral, emotional and developmental problems in children and adolescents by enhancing the knowledge, skills, and confidence of parents. Practitioners are trained to create a supportive learning environment for parents to receive and discuss practical information about parenting skills that they can incorporate into everyday interactions with their children. Specific expected outcomes include:

1.5 hours per session for 4-8 weeks.	Nine weeks	five years of age.	years of age.	Home-based: 7 to 55 weeks (a minimum of 7 home visits), Group-based: 16 to 27 weeks (a minimum of 16 group sessions), Combined program: 16 group-based sessions and a minimum of 7 home-based sessions	15 weeks	The program is designed so that it can be implemented with each family from the child's birth or prenatally until age 3. Services are offered to families for a minimum of two years duration. If parent educators are trained in delivering the Born to Learn Curriculum: 3 Years to Kindergarten Entry, then services ideally would continue until Kindergarten entry. Children may be enrolled at any time within those age windows. This allows siblings to be served by the program, and does not limit participation to children enrolled in infancy or prenatally.	Level 1 Universal Triple P may be planned for intermittent distribution of materials throughout the course of the Level 2-5 interventions. Stay Positive is typically planned as a three-year implementation Levels 2-3 interventions may include 1-4 encounters that take place over 1-6 weeks Level 4-5 interventions typically take place over 4-5 months. If accommodations are needed (e.g., low literacy clients), the duration may be longer.

A computer or laptop and projector are encouraged but not necessary. Host centers may provide childcare for children in a separate room, if needed to make it possible for parents to participate in the program. If possible, facilitators should provide incentives for participants such as gift certificates, food baskets, toys and children's books.	•A host agency or a collaboration of host agencies that provide office space with confidentiality related to participant files/records •Computer and email •Data or tracking system •Cell phones •Program Manager •1 FTE Supervisor per 5-6 FTE home visitors •1 FTE Supervisor per 5-6 FTE assessment staff •Travel expense reimbursement (mileage) for home visitors •A community advisory board •Diversified, and sustainable funding.	A host agency or a collaboration of host agencies that provide office space with confidentiality related to participant files/records Computer and email Data or tracking system Cell phones Program Manager I FTE Supervisor per 5-6 FTE home visitors I FTE Supervisor per 5-6 FTE assessment staff Travel expense reimbursement (mileage) for home visitors A community advisory board Diversified, and sustainable funding	Home Visitation model requires one home visitor to conduct the lesson. Group models require co-facilitators for the parent's program and co-facilitators for the children's program for a total of 4 facilitators. Additional staff may be required if more than 2 babies are attending the sessions. Program comes with 20 A/V parenting lessons for adults on 2 DVDs. Group-based program requires a room big enough to seat 12-15 adults comfortably and a room for the children's session, big enough for approximately 12-30 children.	Space needs are a room capable of seating 15 adults comfortably; a large room for the children's program, preferably in a day care/nursery setting; DVD player and monitor, flip chart/white board. Two facilitators are required to implement the adult program and two additional facilitators are required to implement the children's program; depending on the number of children attending, additional staff may be required.	Prior to sending home visitors to attend a training, new organizations must complete an Affiliate Plan that details their implementation plan. Information on how to start and implement a program is available in the Quality Assurance Guidelines posted at www.parentsasteachers.org. Following approval of the Affiliate Plan, successful completion of the foundational and model implementation trainings and access to the digital curriculum are required for each parent educator. Supervisors must attend the model implementation training and are encouraged to attend the foundational training as well. Parent educators and supervisors also require access to: Office space with a telephone, computer with Internet access, and copier Secure/locked storage for files, books, toys and other materials needed for personal visits and group meetings A meeting space for both staff and	For individual families, practitioners will need the accompanying parent resources for a given intervention and a space to talk with the parent that is comfortable for the parent (e.g. appropriate level of privacy, etc.). These practitioners will also need equipment to show families DVD clips (e.g., laptop with a DVD, portable DVD player, TV with DVD, etc.). For group interventions, practitioners will need A/V equipment to deliver a PowerPoint presentation as well as show DVD clips to parents. Practitioners will also need a white board or flip chart. Level 2-5 interventions require a single practitioner/consultant to provide the direct service. However, it is highly recommended that agencies staff their System Triple P program in order to sustain it. For even the smallest implementations, 4 practitioners are recommended.
Minimum Provider Qualifications Mental health professionals or teachers.	Minimum Provider Qualifications The minimum educational requirement to be an ACT Facilitator and conduct the program for parents is an associate degree, but a bachelor's degree is preferred. It is also expected that professionals joining the program must be working at or with an organization that typically serves families, and must have professional experience working with families and young children and/or conducting/teaching groups of adults. It is also expected that to join the program, professionals need to show support from their organizations for the work ahead.	Minimum Provider Qualifications Program staff is selected because of a combination of personal characteristics, experiential, and educational qualifications. Direct Service Staff should have qualifications including, but not limited to: •Experience in working with or providing services to children and families. •An ability to establish trusting relationships. •Acceptance of individual differences. •Experience and willingness to work with the culturally diverse populations that are present among the program's target population. •Knowledge of infant and child development. Supervisors and Program Managers are also required to have specific qualifications.	Minimum Provider Qualifications Program staff is selected because of a combination of personal characteristics, experiential, and educational qualifications. Direct Service Staff should have qualifications including, but not limited to: •Experience in working with or providing services to children and families. •An ability to establish trusting relationships. •Acceptance of individual differences. •Experience and willingness to work with the culturally diverse populations that are present among the program's target population. •Knowledge of infant and child development. Supervisors and Program Managers are also required to have specific qualifications.	Minimum Provider Qualifications There is no minimum educational level requirement to be trained in the program. Home-based program model requires staff experienced in conducting home-based instruction. Group-based program requires staff skillful in conducting adult groups and staff skillful in conducting children's groups. Staff must be knowledgeable of developmental capabilities of children birth to 5 years, have attended the Nurturing Program facilitator training, and be regularly supervised by agency administrative staff.	Minimum Provider Qualifications There is no minimum educational level requirement for being trained on the program, but experience facilitating adult groups and children's groups and knowledge of developmental skills for children 5 to 12 years is required.	Minimum Provider Qualifications Parent educators must successfully complete the Parents as Teachers Foundational and Model Implementation trainings. Supervisors are required to attend the Model Implementation training, and ideally, Foundational training as well. The intervention requires annual renewal of parent educator certification. For parent educators, 20 hours of continuing education is required their first year, 15 hours in their second year, and 10 hours annually thereafter. Parent educators typically have a bachelor's degree or beyond in early childhood education or a related field with supervised experience working in the early childhood field, although the minimum education level required for a parent educator is a high school diploma or GED and two years' previous supervised work experience with young children and/or parents.	System Triple P provider training courses are usually offered to practitioners with a post-high school degree in health, education, child care, or social services. In exceptional circumstances, this requirement is relaxed when the prospective practitioners are actively involved in "hands-on" roles dealing with the targeted parents, children, and teenagers. These particular practitioners have developed, through their workplace experience, some knowledge of child/adolescent development and/or have experience working with families.
